

Lunch Money

What is Lunch Money?

Lunch Money is a delightfully simple yet powerful personal finance management web app. Colloquially, we're known as a budgeting app, but we are so much more!

Just some of the many features we support!

Bank syncing from 30+ countries

Multicurrency support

Net worth tracking

Manage unlimited budgets

Trends & Stats

World class support

Powerful rules engine

Web-first interface

Spend analytics

Developer API

Let's get to know each other!

We've been around since 2019, proudly bootstrapped and 100% customer-loved & funded. Think of us as the mom & pop shop of personal finance management apps!

Why choose Lunch Money?

Here are just a few of many reasons!

- 1 We have grown mostly organically by word of mouth— a true testament to how much our users love us!
- 2 Survey results reveal users choose us over competitors for our design, ease of use and company values.
- 3 Great tools should be accessible to all! With plans from \$50/year, we're more affordable than leading alternatives.

Let's work together!

We're excited to collaborate in these areas:

- Affiliate partners (20% recurring commission), especially bloggers and IG & TikTok UGC creators
- Seeking a part-time social media manager
- Guest on your entrepreneurship or personal finance podcast

Hi! I'm Jen, founder of Lunch Money!

I started Lunch Money as a passion project in 2019 and ran it solo for 4 years, handling all engineering, design, marketing and customer support.

Today, we are a team of 5 with thousands of subscribers in 30+ different countries, and we're just getting started!
